Profile

I recently graduated from the University of New South Wales with a degree in Computer Science. I currently work on mobile application and server infrastructure at Shodogg ANZ. I write HTML5 demos as a hobby, and am also interested in low-level systems programming.

Skills and Interests

Systems Programming

- Strong knowledge of the C programming language and runtime environment
- Implemented many OS features from scratch in UNSW's Advanced OS course
- Experience working with several microprocessors and controllers
- Undergrad thesis at NICTA focused on the componentization of a virtual machine monitor
- Wrote a multi threading library for the arduino as a personal project

Web Development

- Component using many back-end and front-end web languages and frameworks
- Worked with a variety of database technologies and familiar with SQL
- Develop web applications as a hobby including graphical demos, game engines and blogging software

Application Programming

- Experience with a large variety of high level programming and scripting languages
 - Understanding of computer networks and experience with socket programming
-

Work Experience

- (2014-present) Software Developer at Shodogg
 - Multimedia transcoding and streaming
 - Android and iPhone application development
 - Web development
 - (2011,13-14) Tutor for the School of Computer Science and Engineering at UNSW
 - Taught computing to students from computing and non-computing backgrounds
 - (2013-14) Freelance web development
 - (2011-13) Research Assistant at NICTA
 - Low-level systems programming
 - Circuit design and assembly
 - (2008-09) IT Technician at Leading Edge Computers
-

Extra Curricular and Volunteer Work

- (2010-present) UNSW Theatrical Societies
 - Head of website team for "CSE Revue" - a comedy show run by computing students
 - President of the CSE Revue student society, and producer of the show in 2013
 - Part of cast, tech crew, website team, videos team and exec team for several theatrical societies
- (2011-2014) Volunteer for School of Computer Science and Engineering
 - Volunteered in CSE's Mentor Program, helping first year computing students adjust to university life
 - Camp Leader for CSE's First-Year Camp
- (2013) rUNSWift - UNSW's robotic soccer team
 - Developed a behaviour framework for UNSW's robotic soccer team
- (2012) Student Exchange to University of Toronto
